3.2 Test Before Send

When you have clicked Allow notification you will notice that an orange **Test Before Send** button appears. You can use this button to test notifications (to check how it will appear to users) before send. This page is self explanatory, just fill the information to send messages.

4. Notification Settings

In the Notification Settings tab, you will see various sections depending on plugins you have installed. These sections are

- 1. Welcome Notification
- 2.New Post
- 3. Woocommerce (if installed)
- 4. BuddyPress (if installed)

4.1 Welcome notification setup

A welcome notification is sent when a new user subscribe (allow) for notification. This is the great way to welcome your users and redirect them to appropriate page like privacy policy, terms and condition or any other offers.

To setup welcome notification go Notification Settings -> Welcome Notification

Seec Notification	Natification Setting	Subscribers		
LetsFLsh Notif cate	on Settings

		and Settings		

4.2 New Post

New post section is used when ever a new post is published. You can use custom post types as well. In this section you can set global settings when new post is published

New Post	Υ.
	Send Notification when new post is published
Notification Title	New Post
Notification Message	Use Post's Title
	Use Port's Content Oustant Message
Past Type	past X page X revies X
Notification Icon	Use Post's Featured Image
	Use Gustom loor
Seed NotFostier to	All Gass
	Pagelalarand Ubera Only 👔
Cfukback URL	Use Post's UFL.
	Same Settings

These settings apply to all the new posts when published. However you can disable notification for an individual post while creating a new post in letsPush Notification section

4.3 Woocommerce

Under Woocommerce section in Notification Settings tab, you will see 3 sections.

1. New Product

This notification triggers when a new product added to store

- 2. **Price Drop** This notification triggers when regular price is dropped
- 3. **Sale Price** This notification triggers when sale price added

4. Back in stock

This notification triggers when item back in stock from 0.

5. Abandoned Cart

This notification triggers after specific interval set by admin to send notification to user if there is any abandoned carts

6. Low stock

This notification is for admin and triggers when product stock gets low

7. New order

This notification is for admin and triggers when customer place an order

4.4 BuddyPress

In this section you can turn on or off notification of any specific event

BuddyPress		Y
bhable Notifications
